

# SDWOTS – SD-WAN Advanced Operations & Troubleshooting Bootcamp

**Days:** 5

**Description:** SD-WAN: Advanced Operations & Troubleshooting Bootcamp (SDWOTS) v1.0 is a five-day course. We will cover Cisco Software-Defined WAN (SD-WAN) which is an overlay architecture that overcomes the biggest drawbacks of traditional WAN. Students will be able to operate a Cisco SD-WAN over any transport (MPLS, Broadband, LTE, VSAT etc.) and provide troubleshooting, management, policy control and application visibility across the enterprise. This hands-on Course covers the Cisco SD-WAN product and contains extensive labs to reinforce the knowledge learned.

**Prerequisites:** The knowledge and skills that a learner should have before attending this course are as follows:

- Familiarity with WAN Networks

**Audience:** The primary audience for this course is as follows:

- Engineering and Planning team evaluating WAN evolution
- Personnel involved in SD-WAN Design, Implementation and Operation
- Network Operations team with SD-WAN solution
- Cisco partners who sell and support SD-WAN solutions

**Course Objectives:** Upon completing this course, the learner will be able to meet these overall objectives:

- Describe how to deploy SD-WAN
- Configure SD-WAN environment
- Deploy Zero-Touch Provisioning
