

# SharePoint Designer 2013

**Days:** 1

**Prerequisites:** To ensure your success in this course, you should be a site owner and/or administrator of Microsoft SharePoint 2007, 2010, or 2013. You should have experience with designing and maintaining a SharePoint site.

**Audience:** This course is ideal for SharePoint Developers.

**Description:** Microsoft® SharePoint® Designer 2013 provides a code-free environment to access data types and build custom SharePoint applications. It allows rapid development of SharePoint workflows to meet a company's specific needs. Before SharePoint Designer, most custom SharePoint applications were created with Microsoft® Visual Basic®.

SharePoint Designer simplifies the process with a no-code interface that can be integrated with Microsoft® Visio® 2013 to easily manipulate workflow shapes. In this course, you will create and publish custom SharePoint workflows without code using SharePoint Designer 2013.

## OUTLINE:

### MODULE 1: GETTING STARTED WITH SHAREPOINT DESIGNER 2013

- Introduction to SharePoint Designer
- Get Help and Support for SharePoint Designer

### MODULE 2: CUSTOMIZING AND IMPLEMENTING CONTENT TYPES

- Customize Content Types
- Implement Custom Content Types
